SKULOS

DESIGN SYSTEM — VOLUME II

A field manual for a school platform that reads like a well-set annual report.

Icons on the right.
Metrics lead every card.
One amber accent per screen.
Mobile is the source of truth.

PREPARED FOR EMIIYASEYI · v2 · 2026

In this volume

01 Design rules & anti-AI checklist

02 Icon library (right-aligned system)

03 Responsive grid — desktop → mobile

04 Grading workbench

05 Attendance register

06 Fees & Billing

07 Timetable builder

08 Messaging / Announcements

09 Platform Owner dashboard

10 School Owner dashboard

11 Staff (Bursar/Registrar) dashboard

12 Login & Auth patterns

The rules that keep it un-AI

PRINCIPLES

01 Icons live on the right

Every card, list row, nav item and metric places the icon to the RIGHT of the text. This inverts the Bootstrap/Lucide default and immediately reads as intentional. The text is the subject; the icon is a footnote.

02 Numbers lead, labels follow

In any metric the value is set in Playfair/DejaVu Serif at 26–48pt. The label sits above it in 8pt uppercase. Never the other way around.

03 One amber accent per screen

Amber (#D48721) is a scalpel, not a highlighter. Use it for the single primary action, one active state, or one KPI that matters. Everything else is ink, muted or cream.

04 Asymmetric grids only

Refuse the 3-up card row. Prefer 2/3 + 1/3 splits, off-center heroes, and columns of different widths. AI-generated layouts default to symmetry — so we don't.

05 Mobile is the source of truth

Design the phone screen first, then let the desktop breathe outward. A screen that only works at 1440 is a broken screen. Every wireframe in this book shows the mobile adaptation next to it.

06 Copy is human

'23 unpaid invoices' beats 'Outstanding Receivables'. 'Kemi missed 3 days' beats 'Attendance anomaly detected'. Never say 'Dashboard Overview'.

The icon library

ICONOGRAPHY

Vector-drawn · 1.4px stroke · right-aligned by default

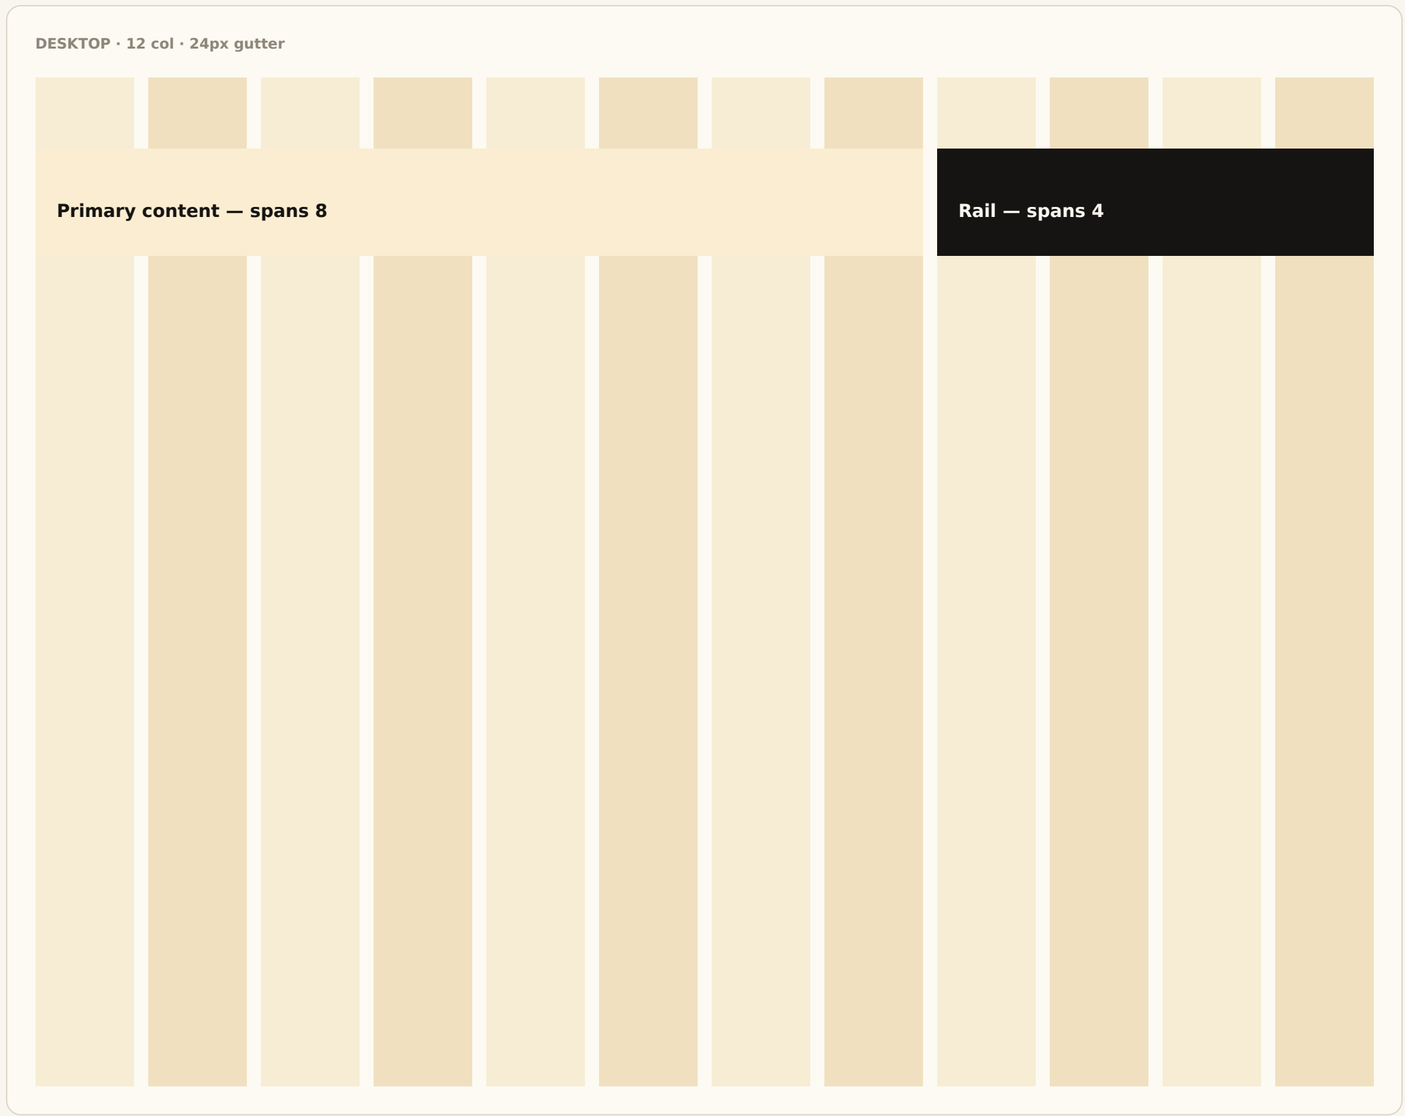

Home `home`	**Profile** `user`	**Class / Group** `users`	**School** `school`	**Course** `book`	**Grade** `grade`
Schedule `calendar`	**Timetable** `clock`	**Attendance** `check`	**Absent** `x`	**Fees** `cash`	**Report** `chart`
Message `message`	**Notification** `bell`	**Announcement** `pin`	**Search** `search`	**Filter** `filter`	**Settings** `settings`
Role / Permission `shield`	**Auth** `lock`	**Export** `download`	**New** `plus`	**Navigate** `arrow`	**Menu** `menu`

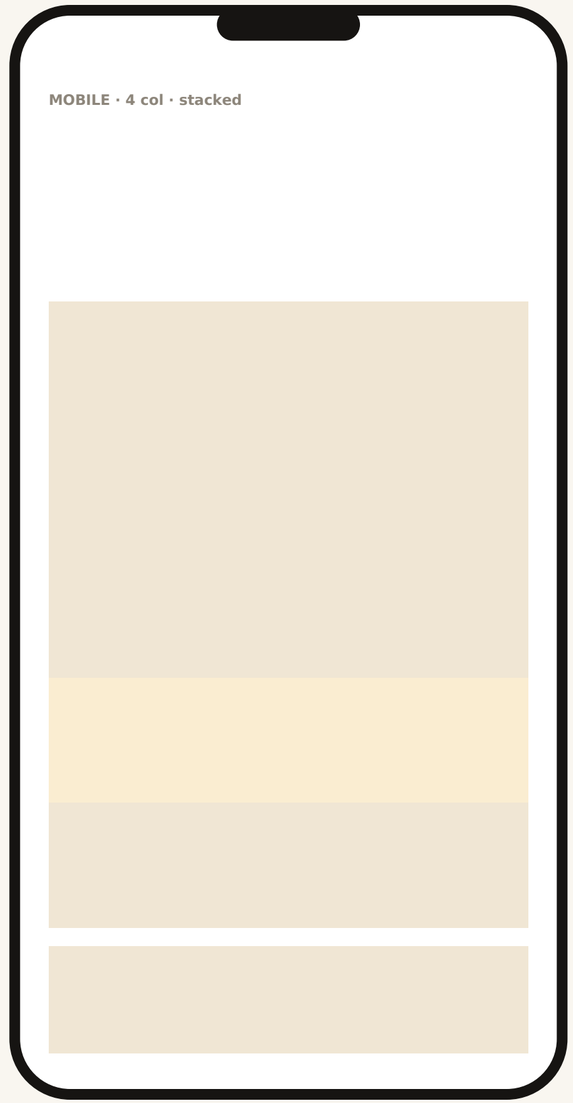

Rule: the icon is always on the trailing edge of the text baseline. Never lead a line of copy with an icon.

One system, two widths

LAYOUT

Desktop 1440 · Mobile 390

Breakpoints: 0–640 stack · 640–1024 2-col · 1024+ 12-col. Every card scales edge-to-edge with 16px gutters on mobile.

About Kemi's absence

MRS OJO · JSS 2B ENGLISH

English CA marks are up

Good afternoon. CA1 scripts are marked. Kemi scored 18/25.

Thank you ma. Any concerns?

Reading is strong. Composition needs practice. I'll send exercises.

Write a reply...

v2

Handoff

PASTE THIS INTO CLAUDE

You are upgrading Skulos. Match this design system exactly:

- **Palette: cream #F9F6F0 background, ink #16140E text, amber #D48721 accent (one per screen), muted #8C857A.**
- **Type: Playfair Display (or DejaVu Serif fallback) for numbers and titles. Inter (DejaVu Sans fallback) for UI.**
- **Icons: hand-picked line set, 1.4px stroke, RIGHT of the text on every card, row, nav item and metric.**
  Never lead a line with an icon.
- **Numbers lead cards. The value is 24–48pt serif; the label is 8pt uppercase above it.**
- **Layouts are asymmetric. No 3-up card rows unless the content genuinely warrants it.**
- **Mobile-first: every screen must work at 390px. Tables collapse into cards.**
  Segmented controls, bottom tab bar, single-column stacking, edge-to-edge cards with 16px gutters.
- **Copy is human, specific and short. Numbers over adjectives.**
- **Only ONE amber element per screen: usually the primary CTA or the single highlighted KPI.**

Screens included in this lookbook (v2):
Grading · Attendance · Fees & Billing · Timetable · Messaging
Platform Owner · School Owner · Staff (Bursar) · Login

Every screen ships in two widths: desktop (1440) and mobile (390). Build both.
